# UK Returns Policy

Document ID: POL-RET-UK-001 | Version: 2026.1
Effective: 2026-01-01 | Region: UK
Tier: ALL | Status: APPROVED
Section: Region-specific return handling

For orders delivered in the United Kingdom, use the UK-specific return terms shown for the item and order. The eligibility window, exceptions, return address, and instructions may differ from the US policy. The order confirmation and the policy version applicable to the order should be checked before advising a customer.

Customers should start a request from Order History and wait for the return authorization before sending the item. The item should include required accessories and proof of purchase where requested. If the product arrived damaged or incorrect, use the appropriate issue-reporting workflow.

This synthetic document is for testing region filters and is not legal advice or a statement of actual UK consumer law. If the applicable policy version or order region is unclear, ask for clarification rather than applying US terms.
